

Pacifica Chipper Program

When?

Pacifica chipping program grant funding began August 2021 and the funding has been extended to November 2022. **This may be the last opportunity to take advantage of the FREE chipping benefit provided by the Coastal Conservancy grant.**

Please visit northcountyfire.org/pacifica-chipping-program to see scheduled chipping day(s) in your area.

What is the Chipper Program?

The chipper program is a FREE wildfire prevention program to help residents decrease their neighborhood threat from wildfire. Protect your home and property by creating defensible space. Removing hazardous, flammable vegetation can drastically reduce the intensity and spread of fire onto your property.

What should I clear to create “Defensible Space”?

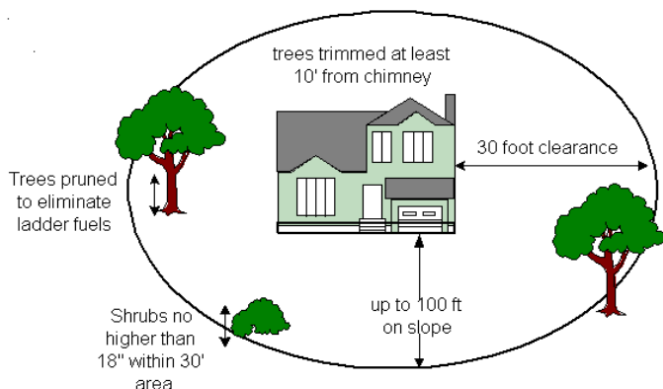

Clearing dead vegetation, overgrown bushes and removing lower tree limbs around your structure including from your fence line down to the roadway, where most ignitions occur. Removing this type of hazardous vegetation, especially scotch broom, is important to wildfire resiliency in your neighborhood.

How does it work?

Leave your cut vegetation adjacent to your property curbside before 8:00 a.m. no more than 7 days prior to the scheduled chipping date. Stack cut ends towards the street. Limit your pile to 10' wide by 10' long by 5' high. Do not obstruct the roadway when stacking material. Branches may be up to a 10" diameter. The chipper will chip and remove the material.

What is not Allowed?

The chipper cannot take piles of leaves, vines, or loose eucalyptus bark. Poison oak is optional, and vines intermingled in trees can be cut at the base of the vine to mitigate ladder fuels.

Kendell Ct, Picardo Ct	Linda Mar/ Park Pacifica	11/07/2022

North County Fire Authority and the City of Pacifica want to encourage residents to take advantage of the Chipper Program. As we near the Fall of 2022, opportunity for chipping is limited and **this may be your last chance to participate** in the program. The Pacifica Vegetation Reduction Chipping Program will conclude November 2022.

1. Leave cut vegetation adjacent to curbside with cut ends out.

2. Limit pile size to 10' wide by 10' long by 5' high.

3. Wait for chipping crews to remove materials.
